

From First Line of Code to Tech Career

Six clear stages. Follow them in order — each one builds on the last. Every stage maps to a Loop & Logic course and a 100% free YouTube playlist, so you can start today.

1

Build Your Base

START HERE · NO EXPERIENCE NEEDED

Variables, data types, loops, arrays, functions, recursion, pointers, structures & file handling — plus weekly contests to lock it in.

C PROGRAMMING

2

Master Data Structures

THINK LIKE AN ENGINEER

Linked lists, stacks & queues, expression evaluation, trees (Binary, BST, AVL), heaps and graphs with hands-on implementations.

DATA STRUCTURES

3

Solve Efficiently

CRACK INTERVIEWS & CONTESTS

Complexity analysis (Big-O), divide & conquer, greedy, dynamic programming (LCS/knapsack) and graph algorithms (Dijkstra, MST).

ALGORITHMS

4

Engineer Real Software

BUILD THINGS THAT SCALE

The 4 OOP pillars in Java, UML design, SQL & schema design (DBMS) and digital logic — the core every CS degree & job needs.

OOP · DBMS · DLD

5

Strengthen the Theory

ACE YOUR COURSEWORK

Differential equations, Laplace & Fourier transforms (Engineering Math), plus Physics 101/102 and MAT-101/102 fundamentals.

ENG MATH · PHYSICS · MATH

6

Specialize & Launch

TURN SKILLS INTO A CAREER

Go deep into AI / Machine Learning & Data Science, build a project portfolio, compete, and prepare for technical interviews.

AI/ML · DATA SCIENCE

Ready to start your journey?

Join 1,000+ students and 4,500+ subscribers learning with Loop & Logic.

Register for the Foundation Program

Watch 10 Free Courses on YouTube

Tip: start free on YouTube, then go deeper with the structured program for mentorship, contests & certificates.
